

Feeding & Sorting Units

technical data

At the 5th decade of its activities in the field of automation, Eleksan is considered as the principal supplier of feeding systems and custom designed machinery in Turkey

The feeding and sorting systems manufactured by Eleksan are characterised by our extensive know-how, the expertise of our staff and the incorporation of related manufacturing technologies to our production process.

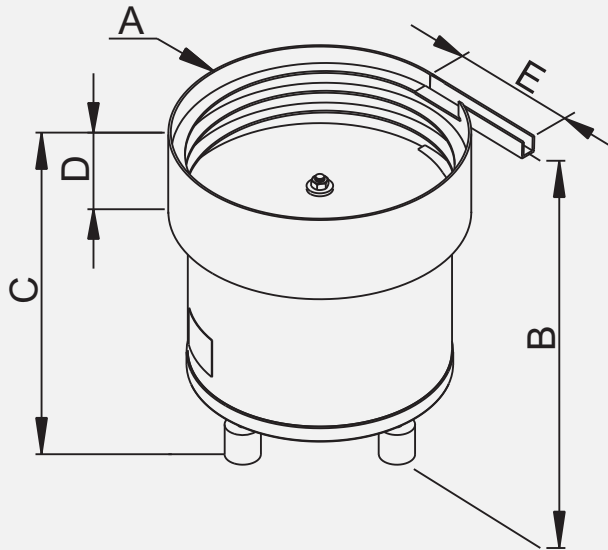

The bowl feeders, linear feeders and related systems of our brand offers innovative, field tested and competitive feeding and sorting solutions.

Bowl Feeders

- **High Feeding Quantities:** Maximum production performance
- **Reliability:** Uninterrupted operation without blockage
- **Minimalised Wear & Tear:** Correct design and use of materials and advanced coating technologies
- **Versatility:** Use of interchangeable baffles

TYPE:	ED85	ED150	ED200	ED250	ED300	ED400	ED500	ED650
A - Bowl Diameter	100	150	200	250	300	400	500	650
B - Height of Output Section	95	170	220	270	320	370	470	510
C - Total Height	115	270	250	300	330	450	470	470
D - Height of Bowl	30	80	80	80	100	130	150	150
E - Length of Output Section	50	75	100	125	150	200	250	250

Dimension values given in millimeter

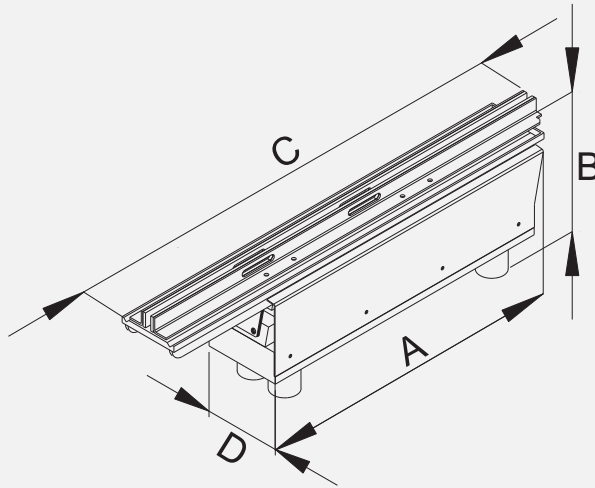

Linear Feeders

- **High Feeding Quantities:** Maximum production performance
- **Reliability:** Uninterrupted operation without blockage
- **Minimalised Wear & Tear:** Correct design and use of materials and advanced coating technologies

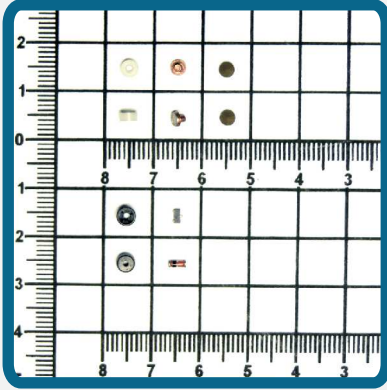

TYPE:	EL150	EL200	EL250	EL450
A - Vibration Unit Length	145	200	250	435
B - Vibration Unit Height	100	100	105	195
C - Output Section Extention	200	300	350	600
D - Vibration Unit Width	40	40	72	120

Dimension values given in millimeter
